Office Action Summary				

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 53, 54, and 57-61, drawn to a method of ablating cardiac tissue, classified in class 604, subclass 20.
- II. Claims 19-26, 42-49, 55, 56, and 62-74, drawn to a device for ablating tissue, classified in class 606, subclass 41.
- III. Claims 27-33 are, drawn to a device for ablating cardiac tissue, classified in class 606, subclass 42.
- IV. Claims 34-41, drawn to a method of delivering energy to ablate tissue, classified in class 606, subclass 38.
- V. Claims 50-52, drawn to a method of creating a continuous lesin, classified in class128, subclass 898.

Inventions I and II or III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the devices could be used to shrink collagen.

Art Unit: 3739

Inventions V and II or III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the devices could be used to shrink collagen.

Inventions IV and II or III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the devices could be used to shrink collagen.

Inventions I, IV, and V are all distinct methods.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as in a hyperthermia device. See MPEP § 806.05(d).

Application/Control Number: 09/507,336 Page 4

Art Unit: 3739

A telephone call was made to Jens E. Haskendyk on September 28, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to David Shay at telephone number (703) 308-2215.
